WEEKLY ACTIVITY REPORT

NAME: PHAM HUYNH TRI MINH   ROLE: TEAM MEMBER

DATE: DECEMBER 04, 2017   WEEK: 7 (27/11-1/12/2017)

PRESENT ACTIVITY

ACTIVITY SUBJECT:	Learn to use Visual Studio Team Services to manage the project (pick another tools if it too big for this project) (continue)
	Redesign process, make it more effective and search for a way of running a smart contract without gas/money.
	Can use the Lab to test some frameworks. (continue)
STATUS:	90% - Choose Asana to manage. Had created and assigned tasks in Asana, in progress of filling documents on Asana.
	70% - Can deploy and run a smart contract with gas/money free cause it's running on test network.
	70% - Can use the lab but still stuck with the hardware.
RESULT:	https://app.asana.com/0/487848282932192/board
	https://coursetro.com/courses/20/Developing-Ethereum-Smart-Contracts-for-Beginners
	Don't understand enough about the technology but get the concept. Will try the Đapp to run the smart contract with graphics interface.
	Download and install some libraries and packages.
HOURS:	32 hours
